

Deltalab Coplin Type Staining Jar

Product Code: I91087

Brand: Deltalab

Deltalab's Coplin Type Staining Jar is made of opaque white, unbreakable and autoclavable polypropylene. It is designed to stain 5 standard microscope slides.

It features a rectangular container with a rounded base and screw ribbed flat cap with an inner ring for preventing leakage.

Used as a storage system, it can hold up to 10 slides (2 per groove).

Specifications:

Base Diameter (mm)	60
Height of Jar (mm)	110
Height of Jar with Cap (mm)	114
Material	Polypropylene
Case Quantity	12
